June 16, 2023

Maria Robinson  
Director  
Grid Deployment Office  
United States Department of Energy  
1000 Independence Avenue SW  
Washington, D.C. 20585

Dear Director Robinson:

We appreciate the U.S. Department of Energy’s (DOE) focus on interregional transmission planning. This includes making funding available through your office for planning, modeling, and analysis and to facilitate stakeholder discussion.¹ In addition, as you know, DOE’s Draft National Transmission Needs Study released earlier this year, as well as DOE’s Atlantic Offshore Transmission Study, identified the anticipated need for substantial new transfer capacity between various regions such as New England and New York and the Mid-Atlantic and New York, as well as system and governmental needs for the successful integration of new resources throughout the Northeast and Mid-Atlantic.² Federal legislators and the Federal Energy Regulatory Commission are also exploring or proposing changes to transmission planning and operations to increase transfer capabilities between regions.

Rather than wait for new regulatory mandates to spur action, we can collectively take steps now to consider expanding ties between our regions to help enhance system reliability and transition to a clean energy future more quickly and affordably. To facilitate this effort, we are respectfully writing to request your assistance in forming a “Northeast States Collaborative on Interregional Transmission.” By convening this group and leveraging DOE’s technical expertise, DOE and states representing New England, New York, and New Jersey can work in partnership to explore opportunities for increased interconnectivity, including for offshore wind, between our regions.

In addition to DOE and the states, the three regional transmission organizations (RTOs) representing our regions could be invited to participate as additional technical support to the Collaborative. As RTOs, they are uniquely positioned to help identify cost-effective options for increasing transfer capability and have been coordinating on planning for many years through an

---

existing interregional process. The Collaborative’s work could be expanded to include other states and, at a later stage if and when appropriate, Canadian representatives.

We would welcome an opportunity to discuss the development of the Collaborative in more detail, including its potential scope of work and objectives. Let’s build on the strong partnership between DOE and the states to strengthen our power grid, drive down consumer costs, and accelerate the deployment of clean energy.

Sincerely,

Rebecca Tepper
Secretary
Massachusetts Executive Office of Energy and Environmental Affairs

Katie S. Dykes
Commissioner
Connecticut Department of Energy & Environmental Protection

Dan Burgess
Director
Maine Governor’s Energy Office

June E. Tierney
Commissioner
Vermont Department of Public Service

Doreen M. Harris
President and CEO
New York State Energy Research and Development Authority

Joseph L. Fiordaliso
President
New Jersey Board of Public Utilities

Chris Kearns
Acting Commissioner
State of Rhode Island Office of Energy Resources

Jared Chicoine
Commissioner
New Hampshire Department of Energy
