

# JOIN THE BATTLE. BEAT THE BUG.

The spotted lanternfly is an invasive insect that is putting American agriculture and forests at risk. Join us. Together, we can stop the spread of this destructive pest.

## DRIVER'S CHECKLIST

### Life stages of the spotted lanternfly

**Egg mass**  
Sept.-June

**Early nymph**  
April-July

**Late nymph**  
July-Sept.

**Adult**  
July-Dec.

### Before you leave your company lot or work site, check for spotted lanternflies on your vehicle's:

- Doors and sides
- Grill
- Bumpers
- Wheel wells
- Roof
- Cargo

*Remember to park away from trees when possible, and close windows to keep spotted lanternflies out.*

### Check items stored outside for the pest before moving them to a new location:

- Propane tanks
- Outdoor machinery
- Wooden pallets
- Shipping containers

### When you find an egg mass:

- Scrape it into a plastic bag or container that contains rubbing alcohol or hand sanitizer.

### When you find a nymph or an adult:

- Squash it.

### Report any spotted lanternflies you see to:

**Mass. Dept. of Agricultural Resources**
